ABOUT ME

As a self-taught and ambitious Full Stack Web and Mobile App Developer with a focus on front-end development, I have spent the past 4 years creating innovative solutions to address societal issues and transform communities in the digital era. My passion for programming is driven by the desire to create high-quality products that make a real impact on people's lives.

I am highly enthusiastic and eager to learn new and challenging things, and I have a proven track record of contributing to the success of my teams through hard work, dedication, and meticulous attention to detail. I am committed to understanding clearly any task given to me, as well as the scope of the project, in order to deliver quality products that meet and exceed the expectations of the customer.

I am a motivated self-starter who is always seeking to learn, grow, and take on new challenges. I am also highly flexible and adaptable, and I am able to work effectively in any role or task assigned to me. I would be thrilled to bring my passion, skills, and experience to your organization and contribute to the success of your team.

WORK EXPERIENCE

Spotmate

Senior level | Front end web developer
Remote , Nigeria
2022-11-01 | 2023-05-01

During my brief employment at Spotmate, a startup building a social network site for gym enthusiasts, I made significant contributions to the development of the product.

I was responsible for redesigning the landing page to match the UI design from Figma. In addition, I implemented various features such as adding, liking, and bookmarking posts, commenting on posts, and enabling infinite scroll for the feed and profile pages.

I also worked on the follow and unfollow feature, which enabled users to connect with other users in the network. Furthermore, I added image cropping functionality before upload to improve the user experience.

All of these features were built using Next.js and Tailwind CSS, and they significantly improved the functionality and usability of the site. Through my work, I was able to gain

extensive experience in web development technologies and frameworks, as well as a deep understanding of UI/UX design principles.

I am excited to bring my expertise in front-end development and passion for creating high-quality user experiences to a new role in the tech industry.

BridgeGap Consults

Mid level | Full stack web developer

Remote , Nigeria

2022-04-01 | Currently working here

As a Full Stack Web and Mobile App Developer, I have worked on a variety of projects that demonstrate my technical expertise and ability to collaborate effectively with others.

Firstly, I single-handedly designed, built, and deployed a comprehensive HR and employee management software, which streamlined the HR operations of the company and improved the efficiency of the organization's HR department. The software included features such as employee recruiting, loan and leave request, payroll and payslip calculations, ITF, HMO etc. It was built using Reactjs for the frontend, Laravel for the backend with MySQL database.

In addition, I collaborated with another developer to create the front-end of a Job Board and Interview Management platform. This platform enabled companies to manage their hiring process more effectively and efficiently, and provided job seekers with a seamless experience. The frontend was designed using Tailwind CSS which can be found with link <https://careers-ui.netlify.app>

Finally, I redesigned the front-end of a Housing and Estate Management web application, which significantly improved the user experience and increased user engagement. Through my work, I was able to enhance the aesthetics and functionality of the application, making it more user-friendly and intuitive for users.

Overall, my experience in designing, building, and deploying various web and mobile applications has enabled me to gain a comprehensive understanding of various programming languages, platforms, and frameworks. I am confident that my skills, experience, and dedication to delivering quality products will make me a valuable addition to any tech team.

EDUCATION

Federal University of Technology, Minna

Degree | Mechanical Engineering

I am currently pursuing a degree in Mechanical Engineering from one of the top technological universities in Nigeria. While my current course of study may not directly align with my current career path in software development, I am constantly seeking ways to learn and improve my skills in this field.

Although I was not initially aware of the opportunities in software engineering when I began my studies, I have since developed a deep passion for this field and have been pursuing opportunities to gain experience and develop my skills.

Through various personal projects and experiences, I have gained extensive knowledge of software development technologies and frameworks, which has enabled me to build high-quality applications that meet the needs of users.

JOB SKILLS

React js

JavaScript

PHP
